

Dear Hiring Manager,

I am writing to express my interest in Solution Architect and Senior Engineering opportunities within your organization. I bring 10+ years of experience architecting, scaling, and optimizing enterprise-grade commerce platforms on Adobe Commerce Cloud (PaaS) and high-concurrency Python microservices. I specialize in Adobe App Builder serverless solutions, real-time enterprise integrations (SAP via Dell Boomi), and cloud-native AWS architectures.

Currently, I work as a Staff Engineer at Nagarro, where I lead platform architecture and enterprise integrations for global clients, including ASSA ABLOY. My work spans consolidating 39+ global storefronts (100K+ SKUs), establishing real-time SAP ERP synchronization patterns (MDM, Orders, Pricing) via Dell Boomi with zero transaction loss, and designing in-house API product configurators that eliminate costly third-party licensing dependencies.

I have deep hands-on expertise with Adobe Commerce Cloud (PaaS) environments, Adobe App Builder (I/O Runtime & Events), performance optimization (Varnish/Redis caching, boosting throughput by 30%+), and production governance. I am an Adobe Certified Professional – Adobe Commerce Developer, ensuring rigorous adherence to enterprise architectural standards and zero-downtime CI/CD deployment pipelines.

In addition to Adobe Commerce, I bring strong expertise in Python (FastAPI / Django), where I architected an asynchronous multi-carrier shipping and telemetry platform handling 500K+ monthly logistics events and 1M+ customer queries across 30+ regions. I also actively leverage AI-enabled development workflows (GitHub Copilot, Gemini, ChatGPT) to accelerate API prototyping, unit test generation, and system delivery by 35%.

I have extensive experience owning complex distributed systems end-to-end—from system design and mentoring 5–8 engineers to production releases and incident management (reducing MTTR by 25%). I value clean code, high-throughput performance, and maintainable architectures that directly drive business value.

I would welcome the opportunity to discuss how my architecture, Adobe App Builder, and Python integration expertise can contribute to your engineering initiatives.

Thank you for your time and consideration.

Kind regards,

**Prince Yadav**

Solution Architect | Adobe Commerce Cloud (PaaS) & App Builder | Python Microservices
