

Prince Yadav

Solution Architect @ Nagarro | Adobe Commerce Cloud & Adobe App Builder | Python (Django/FastAPI)

Jaipur • +91-9887852003 • princemukdam@gmail.com • linkedin.com/in/prince-yadav-80001359

SUMMARY

Solution Architect with 10+ years of experience designing and scaling global enterprise commerce platforms on **Adobe Commerce** and **Python**. Specialized in **Adobe App Builder** serverless solutions, real-time **SAP/Boomi** integrations, and cloud-native AWS architectures supporting **100K+ catalogs** across **30+ regions**. Proven engineering leader focused on system design, performance optimization (**30%+ throughput gains**), and leveraging AI-assisted development to maximize delivery efficiency.

CORE SKILLS

- **Python & Backend Engineering:** Python, Django, Django REST Framework (DRF), FastAPI, Asynchronous APIs, Microservices, Event-Driven Architecture
- **eCommerce & Adobe Ecosystem:** Adobe Commerce (Magento 2), Adobe Commerce Cloud, Adobe App Builder (I/O Runtime & Events), Multi-Store Architecture, Dell Boomi & SAP ERP Integrations
- **Cloud, DevOps & Infrastructure:** AWS (EC2, S3, RDS), Docker, Docker Compose, CI/CD Pipelines, Nginx, Linux, Git, New Relic, Adobe Commerce Cloud CLI
- **Databases, Caching & Search:** MySQL, Redis, Varnish Cache, Elasticsearch, OpenSearch, Indexing & Query Latency Optimization
- **AI-Enabled Development & APIs:** GitHub Copilot, ChatGPT, Gemini (AI-driven code generation, prototyping & testing), REST APIs, GraphQL, Webhooks

EXPERIENCE

Staff Engineer (Promoted from Associate Staff Engineer) — **Nagarro** • Aug 2020 – Present

Client: ASSA ABLOY (*Global B2B/B2C Security & Hospitality Products*)

- Spearheaded enterprise platform migration from legacy IBM WebSphere to **Adobe Commerce Cloud**, consolidating 39+ global storefronts (100K+ SKUs) and driving a **30%+ boost** in transaction throughput.
- Architected an event-driven serverless rate calculation service on **Adobe App Builder** (I/O Runtime), slashing checkout latency by **45%** and eliminating **\$50K+** in annual third-party licensing expenses.
- Engineered bidirectional real-time **SAP ERP integrations** (MDM, Orders, Pricing) via **Dell Boomi**, automating 50K+ daily data syncs with zero transaction loss.
- Accelerated API response times by 30–40% by implementing distributed Redis and Varnish caching tiers, reducing MTTR by 25% through automated real-time observability.
- Governed architectural standards and led a team of 8 engineers, enforcing 100% test coverage and zero-downtime CI/CD release cycles.

Multi-Carrier Shipping Operations & Telemetry Platform

- Engineered a high-throughput carrier telemetry platform using **Python (FastAPI/Django)** microservices, processing 500K+ monthly logistics events across FedEx, UPS, DHL, and USPS with sub-second response times.
- Designed resilient asynchronous webhook consumers and message queues with automated dead-letter failover, maintaining **99.9% service uptime** under peak load.
- Exposed real-time tracking and exception APIs, integrating directly into enterprise storefronts and Order Management Systems (OMS).
- Reduced WISMO support tickets by **40%** by replacing legacy SaaS with an in-house tracking service, accelerating feature deployment by 35% using AI-assisted workflows.

- **Mindhouse (Python/Django Backend):** Architected scalable RESTful APIs and optimized ORM database queries with DRF and MySQL, scaling backend infrastructure to support 25K+ concurrent active users.
- **ICICI CMA (Enterprise Document System):** Formulated a secure role-based document workflow API, reducing document compliance verification turnaround by 30% across 500+ regional banking branches.
- **Amazon Pay Plugin (Fintech/eCommerce):** Built enterprise Magento payment modules featuring asynchronous IPN webhook handlers, instant automated refunds, and dual-entry reconciliation across 15+ merchant accounts.
- **NihalFashion/Shopagi:** Delivered 5+ high-conversion storefronts with interactive product customizers and streamlined checkout funnels, improving mobile conversion rates by 22%.

KEY PROJECTS

- **Enterprise Multi-Tenant Commerce Platform (Adobe Commerce):** Orchestrated multi-region platform for **39+ countries** and **100K+ SKUs**; standardized bidirectional **SAP integrations** (MDM, Orders, Pricing) via **Dell Boomi** to support 100K+ daily transactions.
- **In-House SAP Product Configurator:** Designed an API-driven product configurator integrating directly with SAP for real-time custom B2B pricing, replacing costly external licensing platforms and saving \$50K+ in recurring annual SaaS expenses.
- **Cloud-Native & Python:** Constructed decoupled microservices and serverless workflows using **Python** and **Adobe App Builder** for event-driven logistics telemetry, carrier API integrations, and streamlined order tracking with 99.9% uptime.

EDUCATION & CERTIFICATION

B.Tech — Rajasthan Technical University

Adobe Certified Professional — Magento Developer

ADDITIONAL INFORMATION

- **System Design & Architecture:** Distributed systems, event-driven architectures, microservices, cloud-native design, high-concurrency API performance.
